**DETAILED ACTION**

1. Claims 1, 3, 4, and 6-16 are pending. Claims 1, 3, 7, 8, 10, 12, 15, and 16 have been amended in this communication filed 8/20/07 entered as Response After Non-Final Action.
2. The objection to the abstract has been overcome by Applicant's amendment to the abstract and is hereby withdrawn.
3. The Objections to the Specification have been overcome by Applicant's amendment to the Specification and are hereby withdrawn.
4. The 35 USC 112 first paragraph rejections have been overcome by Applicant's amendment to the claims and are hereby withdrawn.
5. The 35 USC 112 second paragraph rejections have been overcome by Applicant's amendment to the claims and are hereby withdrawn.
6. Claims 1, 3, 4, and 6-16 are allowed.
7. The following is an examiner's statement of reasons for allowance: The closest prior art is (EP 0509839) Fujita, Takehiro et al, here after Fujita. Fujita discloses map data subdivided and managed according to a coordinate system based upon longitude and latitude and stored in a map graphic database with the coordinate data input by a user which is a point and a base point when a region is designated and a table production program with a coordinate transformation execution program by way of linear interpolation, but fails to disclose a method identifying a centroid from the database based on a user input search request, defining radials extending from the centroid, associating a data item with an address location in the database with the radials

Art Unit: 3694

determined by the user input search request, and displaying the centroid, the radials and data items on a map grid, and calculating an endpoint for each radial in claims 1, 6, and 12; locating positions on a radial with each position corresponding to one of the addressable locations, generating a marker for each located position of the radial and displaying the centroid, the radials, and the markers on a map grid in claim 3; and at least one data item is a location within one of the given areas associated with the centroid and displaying the centroid, the plurality of radials and the at least one data item on the map. For these reasons claims 1, 3, 6, 12, and 15 are deemed to be allowable over the prior art of record, and claims 4, 7-11, 13, and 14 are allowed by dependency.

It appears that the instant invention is beyond the skill of one of ordinary skill in the art. Accordingly the invention would NOT have been obvious because one of ordinary skill could not have been expected to achieve it, NOR would they have been able to predict the results, and as such, they would have had no capability of expecting success.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
